Department of Computer Science & Engineering and Computer Science & Engineering(AI & ML)

A report on 100-Hour intensive Training Program in association with ICT Academy

Date:20-9-2025

The Department of Computer Science & Engineering and Computer Science & Engineering (AI & ML), KLS VEDIT, Haliyal, in association with ICT Academy, organized a 100-hour (80 hours of Technical and 20 hours of Soft Skills) Skill Development Training Program for the 7th semester students. The program was conducted from **11-8-2025 to 1-9-2025** at KLS VEDIT, Haliyal.

The sessions were delivered by the following resource persons from ICT Academy:

- 1. Mr. Prakash [Technical Trainer]**
- 2. Ms. Ayesha[Softskills Trainer]**

Number of Batches: 1

Number of Students Participated: 69

Number of Students certified: 68

Number of Mentors: 2

Objectives:

To enhance employability by bridging the gap between academic learning and industry expectations, equipping students with practical, job-ready skills for a successful career.

Key Takeaways:

The training program spanned a total of 100 hours, divided into structured modules. In the first stage, students were introduced to HTML and CSS, covering the basics of web programming, formatting tags, lists, tables, images, hyperlinks, selectors, fonts, backgrounds, and the box model. The module also included UI/UX Design, where students learned UX research, design strategy, wire framing, prototyping, responsive design, and UX psychology.

In the second stage, the focus shifted to JavaScript and React. Students studied JavaScript fundamentals such as data types, variables, operators, functions, DOM manipulation, event handling, and exception handling. They also gained exposure to React, including its version history, project setup, component creation, and debugging of React applications.

In the third stage, training was provided on Angular Framework, where students were introduced to components, modules, directives, dependency injection, forms, pipes, authentication, animations, and unit testing. Practical sessions and projects ensured students could apply these concepts effectively.

Alongside technical training, the program incorporated structured soft skills sessions aimed at enhancing personal and professional competencies. Communication skills were a central focus, with training in verbal, non-verbal, and written communication. Activities such as public speaking exercises, elevator pitch presentations, and group discussions helped participants become more confident and articulate communicators.

Teamwork and conflict resolution were key components of the soft skills training. Students explored team dynamics, the importance of shared goals, and techniques for managing interpersonal conflicts in professional settings. Finally, personal development was supported through activities aimed at building self-confidence, motivation, and workplace readiness, encouraging participants to take initiative and adapt to diverse work environments.

Outcomes:

- Hands-on proficiency in front-end development technologies.
- Enhanced understanding of UI/UX principles.
- Ability to design, develop, and deploy responsive web applications.
- Improved industry readiness and employability.
- Effective Communication Across All Levels.
- Confident Public Speaking.
- Collaborative Teamwork and Conflict Resolution.
- Effective Time and Task Management.
- Personal Development and Self-Confidence

Conclusion:

The trainers were deputed on a full-time basis by the ICT Academy to conduct the training program and soft skill. The sessions proved to be highly effective and beneficial for the students, and we are confident that this will contribute meaningfully to their career advancement.
